Thesis Title:	Proponents:	
Socius: A Chatbot focused on training Pragmatic Competence assessed through Grice's Maxims and Implicatures	Dimaculangan, Aldwin Renzel P.	
	Guerrero, Miguel Alfonso D.	
	Javier, Devon Jarek Y.	
	Regalado, Luke M.	
	Date/Time Defended	Date/Time Submitted
	July 21, 2025 8AM-9AM	August 6, 2025 1:30 PM

Adviser	☒ for acceptance	Accepted/Approved		
	☐ for approval	Signature	Date/Time	Remarks
Dr. Ethel Ong				

Panel Committee		Checked		Approved	
		Signature	Date/Time	Signature	Date/Time
Chair	Dr. Ethel Ong				
Members	Mr. Edward Tighe				
	Ms. Jackylyn Beredo				

Recommendation of Panel Chair:	☒	Accept with a grade of _____
	☐	Revise and recheck by ALL panel members
	☐	Revise and recheck by _____

Revisions	Page # on the revised document
Removed mention of neurodivergent, made the "reading between the lines" an important part of everyday conversation Reviewed the following sentence for grammar: "The system is built with Python and the Gemini API, trained on the GRICE dataset and augmented with synthetic examples"	2

- This serves as the cover page of the revised document. Items listed should coincide with those listed in the defense evaluation sheet.
- Adviser **must** approve the revisions before its presentation to the panel. Otherwise, panel members **must not** accept then revisions unless otherwise indicated in the revision sheet.
- Panel members sign either in the checked column indicating it has been checked or the approved indicating final approval.
- The lead panel is the last to sign and give the final recommendation.
- Proponent must take note of requirements and deadlines set by the Department through the Thesis Coordinator.

Removed the last sentence (objective) in 1.1	4
Indicated how will the GRICE dataset be tweaked to be applicable to the local context and target users	4
Included a brief discussion on the limitations that might come about due to the target participants and the culture/biases that come from the dataset and the possibility that Filipino participants might not fully understand some examples presented?	5
1.5.1 Indicated how the constructed scenario database will be validated	8
Changed 1.5.3 to Validation that involves inviting young adults to use the chatbot	8-9
Changed 1.5.4 to Data Analysis. Explain how the data collected in 1.5.3 will be analyzed. Include log analysis. (details on log analysis found in 1.5.3)	9
Added 1.5.5 Documentation and Report Writing.	9
Included existing studies on the 3 in-house chatbots - Sociusbot, Amy and Kulturo.	15-16
Table 2.5 formatting issue resolved	21
Converted 4.3 Scope and Limitations to paragraph form	31
Expanded the description of each component of the Archi Design in 4.4 Architectural Design.	33-36
Added section 4.5 Conversation Flow	36-37
Updated the mention of GPT-4 to Gemini	38
Calendar of Activities moved to 1.5, activities made more fine-grained	7
Added 4.7 Resources	38-40
Updated Figure 4.1	33
Indicated how the maxims will be explained to the user	31
Clarified which Gemini model will be considered and its limitations	39
Clarified how GRICE will be used by scenario generation and by the LLM for understanding	38
Changed labels from “Figures” to “Listings”	42-44
Added 5.3 to show knowledge base structure	44
Changed “Thesis proposal” to “Partial document”	1
